5/21/20 The increased number in testing at Towne Centre is related to screening of residents exposed but having no symptoms. The additional testing was completed to insure measures taken at the facility such as cohorting of residents is completed based on test results versus symptoms present in the absence of a confirmed case. Based on CDC guidance we know that not all positive residents are symptomatic. Therefore, before any resident movement the facility is taking every precaution necessary to insure asymptomatic cases are identified and managed as early as possible.
