6/22/20 Test results on the 112 Staff members have been returned to the facility - all test results are negative. The facility completed an additional 14 staff member swabs that are currently outstanding. Testing for residents has also been initiated, currently 51 residents have been tested and submitted to the lab for processing. Over the last week there have been questions related to when the facility will allow for visitation or why is the facility still restricting access when there are no positive cases. I have attached a letter located in the VP letters section of the website providing additional clarification on the reason for restrictions and supporting documents. I trust that this guidance will provide the clarification to the visitation questions you may have.
